INDEX TO VOLUME I

AERODYNAMICS

Approximate Calculation of the Laminar Boundary Layer, B. Thwaites, p. 245

Calculation of Downwash Behind a Supersonic Wing, G. N. Ward, p. 35

A Simplified Theory of "Simple Waves," A. Ghaffari, p. 187

Skin Friction in the Laminar Boundary Layer in Compressible Flow, A. D. Young, p. 137

The Steady Circulatory Flow about a Circular Cylinder with Uniformly Distriouted Suction at the Surface, J. H. Preston, p. 319

The Supersonic Flow Past a Slender Ducted Body of Revolution with an Annular Intake, G. N. Ward, p. 305

AEROPLANES—PERFORMANCE

See also Propeller-Turbines

Determination of Drag of Jet-Propelled Aircraft in Flight, G. W. Trevelyan and D. R. Blundell, p. 89

BLUNDELL, D. R., and G. W. TREVELYAN

Determination of Drag of Jet-Propelled Aircraft in Flight, p. 89

BOUNDARY LAYER

See Aerodynamics

BOWMER, T., and H. PEARSON

Surging of Axial Compressors, p. 195

COMPRESSORS, AXIAL

See Gas Turbines

CONTROL REVERSAL

See Reversal

COX, H. L., and J. R. RIDDELL

Buckling of a Longitudinally Stiffened Flat Panel, p. 225

DOWNWASH

See Aerodynamics

DRAG

See Aeroplanes—Performance

DUNCAN, W. J.

Flutter of Systems with Many Freedoms, p. 59

FATIGUE

See Structures

FLUTTER

Flutter of Systems with Many Freedoms, W. J. Duncan, p. 59

FOREWORD, p. 1

GAS TURBINES

See also Aeroplanes—Performance; Propeller-Turbines

The Measurement of Gas Turbine Combustion Efficiency by Gas Analysis, L. J. Richards and J. C. Street, p. 165

Surging of Axial Compressors, H. Pearson and T. Bowmer, p. 195

GHAFFARI, A.

A Simplified Theory of "Simple Waves," p. 187

GREENOUGH, G. B.

Strain Measurement by X-Ray Diffraction Methods, p. 211

JET-PROPELLED AIRCRAFT; DRAG OF

See Aeroplanes—Performance

MITCHELL, K.

Estimation of the Effects of a Parameter Change on the Roots of Stability Equations, p. 39

PEARSON, H., and T. BOWMER

Surging of Axial Compressors, p. 195

PERFORMANCE

See Aeroplanes—Performance

PIKE, E. C.

Note on Propeller-Turbine Reduction Methods, p. 77

INDEX

PRESTON, J. H.
The Steady Circulatory Flow About a Circular Cylinder with Uniformly Distributed Suction at the Surface, p. 319

PROPELLER-TURBINES
Note on Propeller-Turbine Reduction Methods, E. C. Pike, p. 77

REVIEWS
Computation Curves for Compressible Fluid Problems, C. L. Dailey and F. C. Wood, p. 341
Distribution of Deformation, C. V. Kloucek, p. 340

RICHARDS, L. J., and J. C. STREET
The Measurement of Gas Turbine Combustion Efficiency by Gas Analysis, p. 165

RIDDELL, J. R., and H. L. COX
Buckling of a Longitudinally Stiffened Flat Panel, p. 225

SKIN FRICTION
See Aerodynamics

STABILITY
See also Flutter
Estimation of the Effects of a Parameter Change on the Roots of Stability Equations, K. Mitchell, p. 39

STRAIN MEASUREMENT
See Structures

STREET, J. C., and L. J. RICHARDS
The Measurement of Gas Turbine Combustion Efficiency by Gas Analysis, p. 165

STRUCTURES
Buckling of a Longitudinally Stiffened Flat Panel, H. L. Cox and J. R. Riddell, p. 225
Displacements of a Linear Elastic System Under a Given Transient Load, D. Williams, p. 123
A Note on the Bending Moment Induced in the Booms of a Spar at the Point of Application of a Concentrated Load, H. F. Winny, p. 281
Strain Measurement by X-Ray Diffraction Methods, G. B. Greenough, p. 211
Strength of Aeroplanes in Relation to Repeated Loads, D. Williams, p. 291

SURGING
See Gas Turbines

SWEPT-BACK WINGS
Control Reversal Effects on Swept-Back Wings, Haydn Templeton, p. 3
Note on Templeton, "Control Reversal Effects on Swept-Back, Wings," W. H. Wittrick, p. 339
Notes on the Linear Theory of Incompressible Flow Round Symmetrical Swept-Back Wings at Zero Lift, F. Ursell, p. 101

TEMPLETON, HAYDN
Control Reversal Effects on Swept-Back Wings, p. 3
See also Note by W. H. Wittrick, p. 339

THWAITES, B.
Approximate Calculation of the Laminar Boundary Layer, p. 245

TREVELYAN, G. W., and D. R. BLUNDELL
Determination of Drag of Jet-Propelled Aircraft in Flight, p. 89

URSELL, F.
Notes on the Linear Theory of Incompressible Flow Round Symmetrical Swept-Back Wings at Zero Lift, p. 101

WARD, G. N.
Calculation of Downwash Behind a Supersonic Wing, p. 35
The Supersonic Flow Past a Slender Ducted Body of Revolution with an Annular Intake, p. 305

WILLIAMS, D.
Displacements of a Linear Elastic System Under a Given Transient Load, p. 123
Strength of Aeroplanes in Relation to Repeated Loads, p. 291

WINNY, H. F.
A Note on the Bending Moment Induced in the Booms of a Spar at the Point of Application of a Concentrated Load, p. 281

WITTRICK, W. H.
Note on H. Templeton's "Control Reversal Effects on Swept-Back Wings," p. 339

X-RAY DIFFRACTION METHODS
See Structures

YOUNG, A. D.
Skin Friction in the Laminar Boundary Layer in Compressible Flow, p. 137
